## TWO-FAMILY CAMP

**H**ERE is a summer cottage which provides separate quarters for two families, one large—one small, with a common screened terrace between. The larger apartment has a large living room with a fireplace, three bedrooms, a kitchen and a bath. The smaller apartment has one all-purpose room, a kitchen and a bath.

The over-all dimensions are seventy-four feet six inches by twenty-eight feet four inches.

The walls are faced with vertical siding and the roof is green paper over insulating board. In spite of its size, this camp could be erected with labor which is not necessarily expert.

Complete plans and specifications for this cottage are available for \$1.00. Address your request for the plans to the Architectural Department, *Ladies' Home Journal*, Independence Square, Philadelphia, Pa. House Pattern Number 1417.

House No. 1418

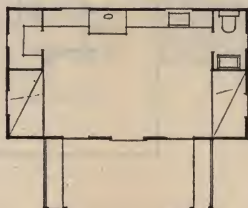

## A CAMP FOR FOUR

**A**LTHOUGH reduced to essentials, this simple vacation cottage is attractive. It consists of one all-purpose room with a pantry and a lavatory. Two double-decker bunks provide sleeping accommodations for four. The stove, sink, refrigerator and working counter are all ranged along the wall opposite the entrance. The low porch with latticed sides adds to the appearance of the cottage as well as offering shade and protection.

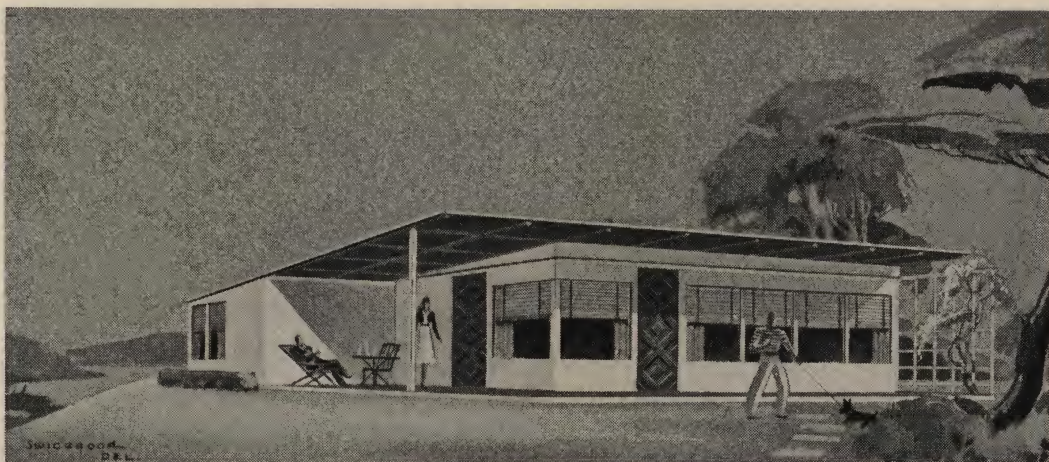

The over-all dimensions, including the porch, are twenty-four feet by nineteen feet. The

house is very inexpensive to build and the construction is not too difficult for the amateur builder. The exterior is of log siding, painted white, over sheathing and the roof of green roofing paper over sheathing, which is easy to put on and very desirable.

Complete plans and specifications for this cottage are available for \$1.00. Address your request for the plans to the Architectural Department, *Ladies' Home Journal*, Independence Square, Philadelphia, Pa. House Pattern Number 1418.

House No. 1419

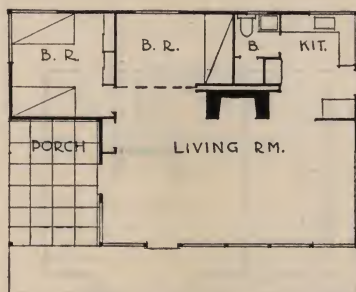

## A TWO-BEDROOM CAMP

**T**HIS attractive shed-roof camp consists of a living room with a fireplace, a kitchen, a small bathroom and two bedrooms. The living room and porch provide space for an overflow when extra guests arrive.

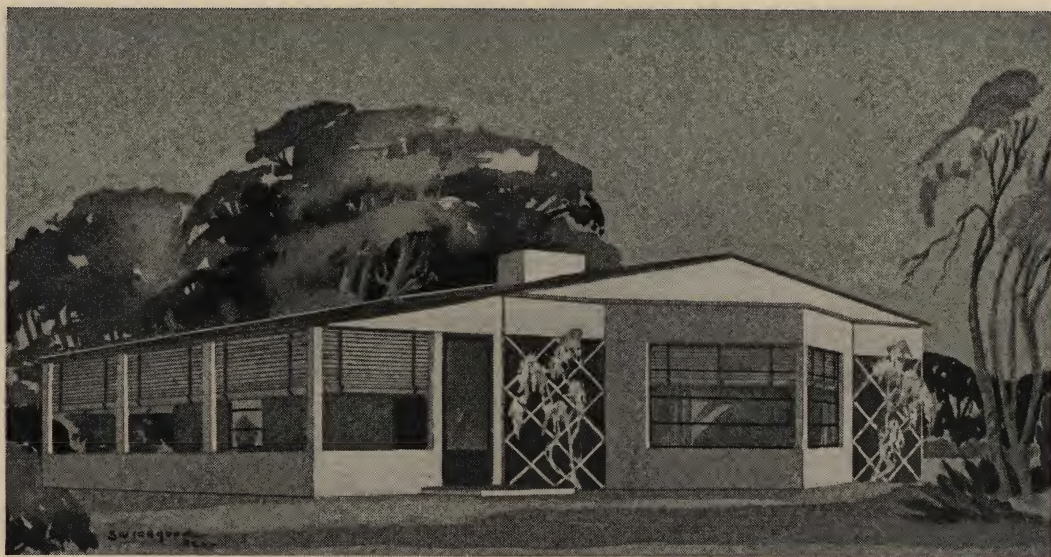

The over-all dimensions are thirty-two feet six inches by twenty-six feet eight inches, including the four-foot terrace across the front. With walls faced with large sheets of weather-proof plywood and with plenty of large and

easily fitted windows on every side, this cottage would be unusually easy to build without employing skilled help, except for the plumbing.

Complete plans and specifications for this cottage are available for \$1.00. Address your request for the plans to the Architectural Department, *Ladies' Home Journal*, Independence Square, Philadelphia, Pa. House Pattern Number 1419.

House No. 1420

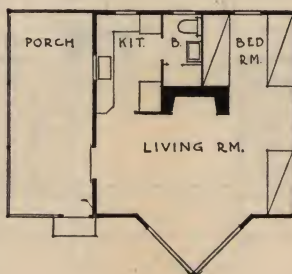

## FOR CAREFREE VACATIONS

**A** TRIANGULAR bay window, opening up the view and giving extra light and air, is an outstanding feature of this vacation cottage, which also has a fireplace in the living room. There is a bedroom off the living room, a small kitchen and a bath as well as a commodious porch, screened in, which can be used for sleeping.

The over-all dimensions are twenty-eight feet eight inches, including the eight-foot porch, by twenty-six feet. The walls are faced

in part outside with weatherproof plyboard, painted white, in part with black building paper, over the sheathing, held in place with diagonal batten strips. The entire house is of extremely simple construction.

Complete plans and specifications for this cottage are available for \$1.00. Address your request for the plans to the Architectural Department, *Ladies' Home Journal*, Independence Square, Philadelphia, Pa. House Pattern Number 1420.

No. 1421

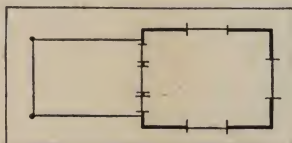

## A TENT ON THE CAMPGROUND

**T**HIS camp will charm the nomad, for it is a tent which can be taken down and moved from one place to another. It will accommodate comfortably a family of four.

The over-all dimensions are twenty-five feet by sixteen feet six inches. The covering is of heavy striped awning material tightly fastened over a substantial framework of iron piping and strongly guyed to a wooden platform that serves as inside floor and porch with its screened-in canopy. The overlapping hood al-

lows for ventilation, yet furnishes complete weather protection. The erection is simple, but the awning material should be fitted and sewed only by an expert to insure satisfactory results.

Complete plans and specifications for this tent are available for \$1.00. Address your request for the plans to the Architectural Department, *Ladies' Home Journal*, Independence Square, Philadelphia, Pa. House Pattern Number 1421.

## A DAY IN THE CAMPBELL

The first day of the Campbell was a day of great interest and activity. The morning was spent in the field, where the men were engaged in various tasks, including the planting of seedlings and the maintenance of the existing crops. The afternoon was devoted to the preparation of the evening meal, which was a simple but hearty fare. The night was spent in the camp, where the men were engaged in various activities, including the reading of books and the playing of cards. The day was a day of great interest and activity, and it was a day that will be remembered for many years to come.
